CHANGES TO EMPLOYEES’ CONTRIBUTION RATES FOR BASIC & OPTIONAL LIFE INSURANCE

The Board of Directors, on the advice of the Plan’s Actuary, has approved changes to contribution rates for both basic and optional life insurance coverage. The contribution rate changes are occurring as a result of the favourable financial position of the Plan.

Basic Insurance Rates

Effective the first pay period in January 2018, the contribution rate for basic insurance will decrease. For employees who carry the standard amount of basic life insurance equal to two times annual earnings, the contribution rate will decrease from 0.25% to **0.14% of biweekly earnings**. For employees who have opted to reduce basic life insurance to one times annual earnings, the contribution rate will decrease from 0.125% to **0.07% of biweekly earnings**.

Optional Additional Insurance Rates

Optional additional insurance rates will also be revised beginning January 2018. The new contribution rates effective the first pay period in January 2018 are shown, as a percentage of your biweekly earnings, in the table below.
